

# Dense prefetch | Measured L1 compute and L2 prefetch

H200 · H=65,536 · Q=128 · revisit request 16 · overlap 1.097090 / 1.837602 ms (59.7% of complete L2 gather)

Overlap includes compute kernels only. D2D copies stay in GPU control; the target gather retains its complete duration beyond the layer boundary.
